

Notary Public Service For Visa Application

In today's world of globalization, technology, and the internet it is difficult for any organization or profession to remain in a 'pen and paper' based world when it comes to the running of their organization or profession. The role of the Notary Public is no different. At present documents that require a notary stamp and seal are manually stamped and verified.

- E-Notary is a Notary Public who notarizes documents electronically.
- One of the methods employed by e-Notaries is the use of a digital signature and digital notary seal to notarize digital documents and validate with a digital certificate.

The only differences between the traditional notary and Electronic Notary (e-notary) are the tools that are involved. All notarial acts remain the same except the introduction of electronic signature, electronic notary stamps, and Video-Audio technology. Personal appearance, positive identification, and required notarial acts are still utilized with online notarization.
